

Our Mission

Kids in Tech strives to excite, educate, and empower children to acquire skills and confidence in technology through interactive after school programs.

Our programs focus on helping kids develop the necessary tech skills and aptitudes to participate in and be future leaders of the 21st-century innovation economy.

Core Values

Inclusion & Innovation

We recognize the importance and value of bringing together individuals and their different perspectives. Real innovation comes when all voices and backgrounds are included.

Communication & Collaboration

We are curious, listen well, and ask good questions to fill the gaps in computer science education. We strive to ensure our future tech leaders come from everywhere.

Impactful Results

We make a difference. We can measure this by the leaders we shape and we focus on results that matter to kids, the communities we serve, and broader society.
